

UTILITY PROJECT MANAGEMENT

Managing utility connections, diversions, disconnections and upgrades can prove to be a demanding, time-consuming task. Multiple points of contact within each utility, coupled with poor contractor performance and a lack of knowledge concerning alternative cost options cause misunderstanding and dissatisfaction amongst consumers.

Wouldn't you rather let the experts organise everything on your behalf? With more than 12 years' experience in our specialist field, UPL offers clients a comprehensive utility project management service. From organising utility connections and diversions to co-ordinating contractors, our dedicated team of professionals

manage all aspects of the utility connection process.

Providing a single point of contact for all of our clients, we apply our unrivalled industry knowledge and expertise to ensure that our clients receive practical, cost-effective solutions to fulfil all of their utility project management requirements. Our specialist value engineering skills, access to senior industry contacts and professional, dedicated approach enable us to significantly reduce our clients' utility connection costs – ensuring that, in many cases, our expert utility project management service is not only self-funding, but also delivers substantial time and cost savings.

UTILITY PROJECT MANAGEMENT AT UPL

- Acting as an intermediary between the customer and the utility company, we efficiently manage all aspects of the utility connection process.
- We deliver practical, cost-effective solutions for all utility management requirements – including connections, disconnections, diversions and upgrades.
- Access to senior industry contacts, expert management of supplier and contractor relationships and unrivalled understanding of the processes involved ensure that we deliver connections on time and on budget.
